Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 00:00 on Saturday 24 Jun 2023 until 23:59 on Sunday 25 Jun 2023

Forecast Issued on Friday 23 Jun 2023 at 15:02

Confidence: High confidence for very warm and humid conditions this weekend, giving way to a fresher westerly airstream for next week. Some uncertainty regarding how active a cold front will be on Sunday, which initiates the change to cooler weather.

Headline for Saturday 24 Jun 2023: A cloudy start with fog patches. Becoming sunny during the afternoon.

Mountain weather hazards on Saturday 24 Jun 2023

Blizzards No Likelihood	**Heavy persistent snow** No Likelihood	**Storm force winds** No Likelihood
Gales No Likelihood	**Severe chill effect** No Likelihood	**Poor visibility** Medium Likelihood
Thunderstorms No Likelihood	**Heavy persistent rain** No Likelihood	**Strong sunlight** High Likelihood

Forecast for Saturday 24 Jun 2023

Weather: A cloudy start with mist and fog patches, especially on hills above around 400 metres. A small chance of the odd spot of light rain or drizzle too. Cloud slowly lifting through the morning to give some sunny intervals towards noon, and then becoming increasingly sunny during the afternoon. A mainly clear evening following.

Chance of cloud-free hill tops above 600m: Around 20 or 30% at first, increasing to 100% mid to late morning and remaining at 100% thereafter.

Low cloud and visibility: Cloud during the morning will have bases down to around 400m, giving poor visibility on the hill tops. Cloud gradually lifting and breaking, with any scattered cloud during the afternoon being above the summits. Visibility becoming good or very good during the afternoon and evening.

Freezing Level*	3300m	3400m	3400m	3400m	3400m	3400m	3300m	3300m	3100m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Early fog patches will make hill walking difficult near the summits, due to the impaired visibility. In the afternoon sunshine UV levels will become high so adequate sun protection may be required.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Sunday 25 Jun 2023

Weather: A warm and bright start. Showers developing from the west from mid to late morning, with further showers breaking out heading into the afternoon, which could become heavy and thundery. Feeling very humid. Showers should die out during the early evening to leave a fine and mostly clear end to the day.

Maximum wind: South to southeasterly 15 to 20 mph, with gusts 25 to 30 mph, becoming west to southwesterly for the afternoon and evening and increasing in association with showers to around 20 to 25 mph with gusts 30 to 35, locally perhaps 40 mph in any heavier thundery downpours. Westerly winds then easing later evening.

Chance of cloud-free hill tops above 600m: 80% or more at first, decreasing to around 30% in showers, then increasing 80% or more again into the evening.

Low cloud and visibility: Cloud may lower onto hills above about 400 or 500 metres temporarily during heavy showers or thunderstorms. Visibility very good, but decreasing to moderate or poor during some of the showers.

Temperature: **Valleys:** PS17C increasing to PS25C
At 600m: PS13C increasing to PS20C
Freezing level: Above the summits throughout.
